Being that we are TaxPaying Citizens. What Right does the Federal Government have telling us how to run our Business, as long as we are not Breaking the Law. The Group that Created the Law that MircoSoft is experiencing, is made up of Lobbyist and self-servient People that are only upset because they are not on the successful end of this situation.

The Government should take into consideration how much Monies MicroSoft has not only Saved the American Public on the Costs of the Internet, as well as Computer Software, but how much additional Tax Revenue it has received from The Public because of Monies spent on the same. I the Cost of Computers and Internet Access were at Higher Levels, the populous of the World would not be able to afford such luxuries. That is exactly what they would be, Luxuries. Thank you MicroSoft for allowing everyone access to the World!
